Crunch Care
Software Developer
Scottsdale, AZ (Remote)

Dear Hiring Manager,

I'm excited to apply for the Software Developer position at Crunch Care. Though I am an entry-level applicant, I would love to bring my passion and creative thinking to your technology services and engineering team. My Japanese and English language abilities, as well as cultural experiences, would help me to bring diverse perspectives for software development. I believe I will make an excellent Software Developer.

In particular I offer:

- Experience collaborating with team member/s in classes, workplace, and volunteer activities
- Leadership, as shown by the leadership roles I took in school projects
- Comprehensive programming skills through Data-Structures, Object-Oriented designs (Java), Information Security, Web Development (HTML, CSS, JavaScript), Operating Systems (C++), Databases (MySQL), and more
- Experience using GitHub, JSON APIs, VMware Workstation, Cisco network devices and many other programming tools
- Experience in Android development (Java, XML, AWS) through senior capstone
- Implementing new features for software/other applications in a concise manner
- Automating works such as summarizing data with Bash, Python, and R
- Experience designing artificial neural networks for health conditions
- Experience in shell injection, sql attacks, encryption, network vulnerability, and more

One of the most important things I learned is that the keys to succeed in a given mission as a team are communication and keeping a positive outlook. My experience and knowledge will accelerate my learning of any new technologies and I will work hard to make an impactful contribution to Crunch Care. I look forward to meeting with you to discuss this position and my background in more detail.

Sincerely,

Yuki Suzuki
